

The background of the image is a dark, moody photograph of several pearls. Some pearls are in sharp focus, showing their intricate surface patterns and luster, while others are blurred in the foreground and background, creating a sense of depth. The pearls are suspended by thin, dark threads. A white rectangular border frames the central text area.

We are COSCIA

È nel 1919 che prende forma il sogno dei Coscia che, grazie all'intraprendenza imprenditoriale che contraddistingue i membri di questa famiglia, dà inizio ad una fiorente attività commerciale legata alla commercializzazione delle qualità più importanti di perle coltivate australiane, tahitiane e giapponesi.

Attività ampliata e consolidata, negli ultimi trent'anni, da Giancarlo Coscia che è riuscito ad esaltare il fascino dell'artigianalità italiana e ad interpretare in chiave moderna la classica gioielleria in perle. Ingegno, dedizione e passione sono i valori che connotano in tutto il mondo lo stile Coscia.

Da anni l'Azienda vanta una proficua e certificata collaborazione con la Japan Pearl Exporters' Association (JPEA) e la propria partecipazione come membro Assocoral.

La sede operativa di COSCIA si trova nel moderno centro direzionale "Il Tari" a Marcanise (CE) mentre si conservano laboratori storici nel distretto di Torre del Greco (NA).

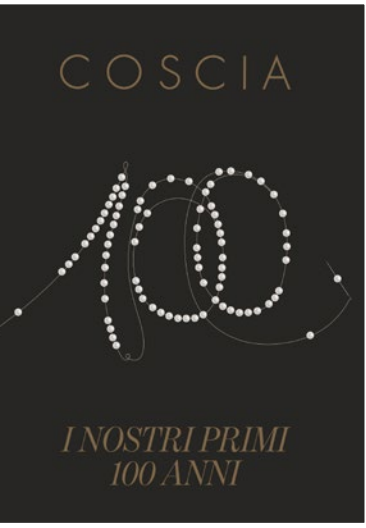

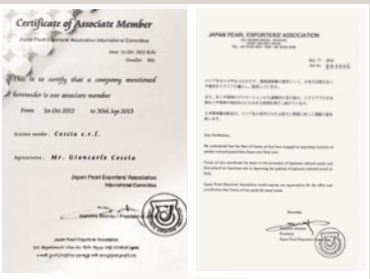

Started in 1919, thanks to the business acumen of the members of this family, Coscia has achieved its long-lasting success through the importing and commercialization of the most important qualities of cultured Australian, Tahiti and Japanese pearls.

During the last thirty years, Giancarlo Coscia, representing the third generation, has consolidated and expanded the family business worldwide, being able to exalt the Italian craftsmanship and refashioning the classic pearls Jewellery with new ideas and modern interpretations. The selection of high-quality pearls together with a well-recognized identity, and exclusive designs, are the main characteristics connoting the style of Coscia Pearls Jewellery worldwide, which is expressed by a wide and varied assortment, suited to meet the needs of all the different kind of customers.

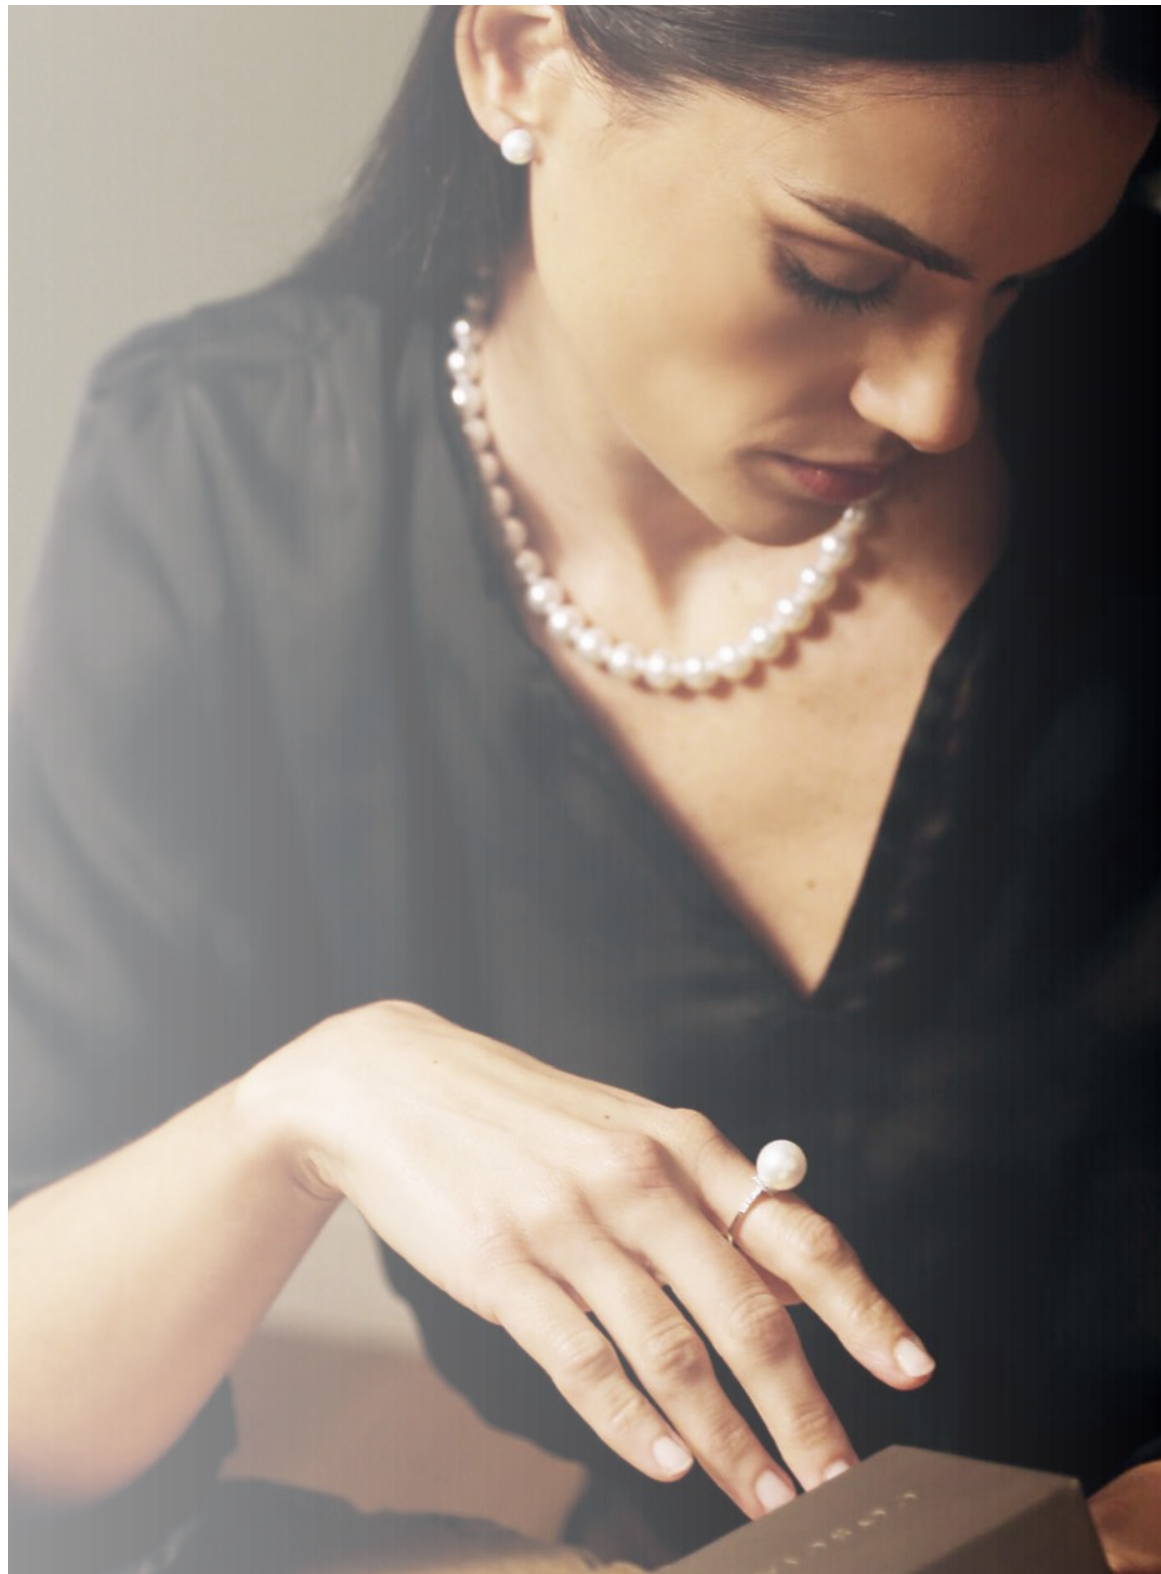

For years, Coscia is an accredited member of the prestigious Japan Pearl Exporters' Association, in Kobe (JP) and, they have a long cooperation with the Assocoral Association, in Torre del Greco (Napoli- Italy). Nowadays, COSCIA headquarters is located in the modern business center Il Tari", in Marcanise (CE), but the historical office is still in Torre del Greco, which is Coscia family's birthplace.

Choose COSCIA

- Da quattro generazioni nel business delle perle coltivate
 - Partecipazione alle principali aste di perle nel mondo: assortimento costante e di alta qualità
- Accurata selezione delle materie prime e garanzia di qualità.
 - For four generations in the business of cultured pearls
 - Participation in the most important Pearls Auctions in the world: regular and high-quality assortment.
 - Skillful selection of raw materials and quality guarantee.

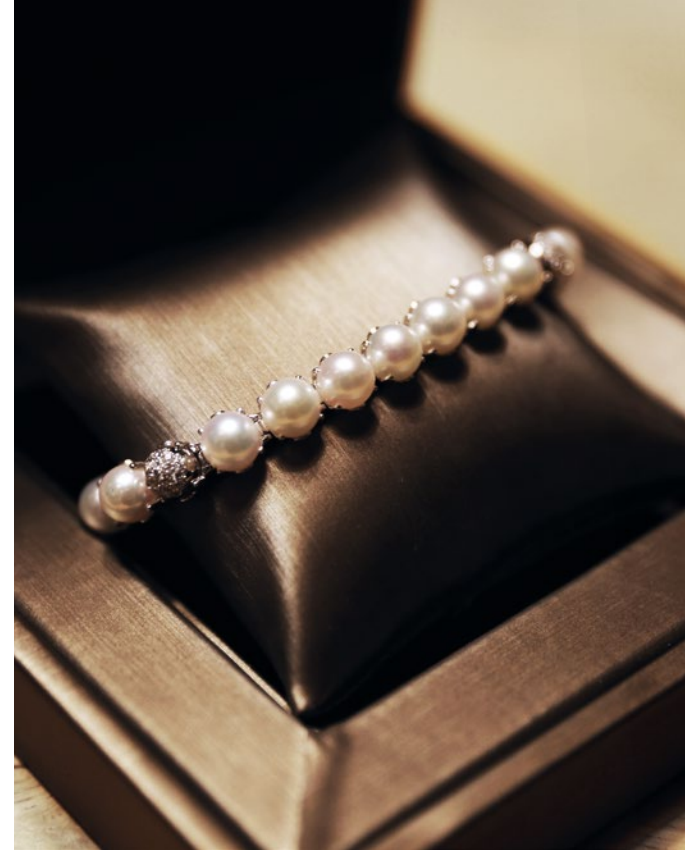

- Il corpo estraneo, o nucleo, viene chirurgicamente inserito all'interno dell'ostrica.
- L'ostrica, per proteggersi, comincia a secernere una sostanza madreperlacea intorno al corpo estraneo, al fine di isolarlo.
- Fino a quando il corpo estraneo resta nel suo interno (solitamente 2-3 anni), l'ostrica continua a secernere intorno ad esso la madreperla, strato su strato.
- Le perle estratte dalle ostriche vengono suddivise e rigorosamente classificate in base al colore, alla forma, allo spessore della madreperla e alla lucentezza.
- The bead, or nucleus, is surgically inserted into the pearl oyster.
- The oyster, as self-defence, reacts by coating the irritant with a crystalline substance, known as 'nacre', in order to isolate it.
- As long as the irritant remains inside (usually 2-3 years), the oyster continues to secrete layer after layer of nacre around it.
- Finally the oyster is opened and the pearls are strictly graded, according to their color, shape, thickness of nacre, and luster.

PEARL *Preciousness*

TYPES OF *Pearls*

La qualità e il valore delle perle dipendono da cinque elementi determinanti: forma, dimensione, colore, superficie e oriente.

FORMA

La più pregiata è quella sferica che evoca l'idea della perfezione. Altrettanto affascinante risulta la perla barocca con le sue particolari irregolarità.

DIMENSIONE

Ogni ostrica dà forma a perle di differenti diametri, aspetto fondamentale per determinarne il valore.

COLORE

Il colore di una perla varia in relazione alla tipologia di ostrica cui appartiene. Per valutarne la bellezza occorre appoggiare la perla su una superficie bianca, illuminata da lampade senza raggi ultravioletti. In questo modo si possono apprezzare le varie tonalità di colore con le diverse sfumature.

SUPERFICIE

La superficie della perla deve essere quanto più liscia e levigata, priva di imperfezioni o difetti.

ORIENTE

L'oriente è un parametro tecnico che definisce l'iridescenza della perla cioè la sua capacità di riflettere la luce.

I BUONI SUGGERIMENTI

Per preservare la lucentezza delle perle suggeriamo di non indossarle quando si applicano trattamenti cosmetici o fissanti per acconciature; pulirle con un panno di cotone umido e custodirle in un panno separatamente da altri oggetti.

The quality and the value of pearls depends on five key factors: shape, size, colour, surface and orient.

SHAPE

The most valuable pearl is the spherical one, which evokes the idea of perfection. Equally fascinating is the Baroque pearl, with its particular irregularities.

SIZE

Each oyster gives pearls different diameters, which is critical to determine their value.

COLOUR

The colour of a pearl varies, depending on the type of the oyster it comes from. To assess the beauty of its colour, it is necessary to place the pearl on a white surface, illuminated by lamps without UV rays. In this way it is possible to appreciate the different shades of the colours.

SURFACE

The surface of the pearl should be as much smooth and polished as possible, without blemishes or defects.

ORIENT

The orient is a technical parameter that defines the iridescence of the pearl. The iridescence is the capability to reflect light.

SOME GOOD ADVICE

In order to preserve the luster of pearls we suggest to avoid wearing them when using perfume or cosmetics. Clean them with a damp cotton cloth and store them in a cloth separately from other items.

PERLE AKOYA

(perle Giapponesi): Sono **perle d'acqua salata**, coltivate nella baia del Sud del Giappone e prodotte dal mollusco chiamato Pinctada Martensii.

Le dimensioni di queste perle variano **dai 2 ad un massimo di 10 mm**. Sono generalmente di colore bianco, con riflessi che vanno dal crema al rosato, o all'argento.

PERLE AUSTRALIANE

(perle dei Mari del Sud): sono **perle d'acqua salata**, coltivate tra l'Oceano Indiano e l'Oceano Pacifico, principalmente in Australia, ma anche nelle Filippine e in Indonesia.

Prodotte dalla Pinctada Maxima, la più grande specie di ostrica da perla, le perle australiane possono raggiungere anche 25mm di diametro, soprattutto nella forma irregolare, detta "barocca".

Il **diametro medio va dai 9 ai 20 mm** e il loro colore varia dal classico bianco/silver, al rosato, o al dorato (golden).

PERLE TAHITI

(perle nere): sono coltivate nella Polinesia francese in grandi ostriche dalle labbra nere - la Pinctada Margaritifera - da cui ne deriva il colore.

In realtà le perle di Tahiti non sono quasi mai di colore nero, ma hanno invece una **varietà di colori e riflessi** che vanno dal grigio argento, al grigio scuro, al verde smeraldo, al turchese, al melanzana, fino al ricercato Peacock (o piume di pavone), per i suoi riflessi multicolori iridescenti proprio come le piume del pavone. Il loro diametro varia **da 8 mm a 18 mm**.

PERLE D'ACQUA DOLCE

(Perle di fiume): si formano in molluschi d'acqua dolce, che vivono nei fiumi, nei laghi o negli stagni della Cina. Sono note per la **grande varietà delle loro forme**, dal barocco, alla goccia, all'ovale, al riso, e più raramente invece assumono forme perfettamente sferiche.

Hanno una varietà di colori naturali che va dal bianco, al rosa, fino al pesca e il diametro varia **dai 2 mm ai 15mm**.

AKOYA PEARLS

(Japanese pearls), are salt water pearls, cultured in the South Japan bays, and produced by the oyster called Pinctada Martensii. Their size varies **from 2 mm to 10 mm** of diameter and their color, basically white, may have some cream, rose or silver overtones.

AUSTRALIAN PEARLS

(South Sea Pearls), are cultured in the water between the Indian and the Pacific Ocean, mainly in Australia, but also in Philippine and Indonesia. Produced by the Pinctada Maxima - the largest species of pearl oyster - the Australian Pearls can reach even 25 mm in diameter, mostly for the irregular shaped, knowns as "baroque pearls". The standard diameter ranges **from 9 to 20 mm** and the color varies from the classic white/silver, to white with rose shades, or to the golden.

TAHITI PEARLS

(black pearls) are produced in French Polinesia in large black-lips oysters - Pinctada Margaritifera - which connotes their colors.

Actually, Tahiti pearls are rarely black but they have **a lot of colors and overtones** ranging from silver, dark grey, green blue, brown, up to the sought-after "peacock", for its multicolored iridescent shades, just like the peacock's feathers.

The size is **from 8 to 18 mm**.

FRESH WATER PEARLS

are formed in freshwater mussels that live in the Chinese lakes, rivers, and ponds.

They are popular for their **wide range of the shape**, from baroque, to the drop, the oval and the rice, and only rarely they got perfectly round shape. Their range of natural colors includes white, pink, and peach colors.

The diameter varies **from 2 mm to 15 mm**.

FREQUENTLY *Asked Questions*

Come si distinguono le perle vere da quelle false?

Il modo più semplice e conosciuto per riconoscere le perle false è il “test del dente”, che consiste nello strofinare leggermente la perla sotto un dente: la superficie di una perla coltivata risulterà ruvida e granulosa, mentre la perla di imitazione apparirà perfettamente liscia.

Che differenza c'è tra la perla coltivata e quella naturale?

La differenza principale risiede nell'inserimento del nucleo: mentre per le perle coltivate questo processo avviene artificialmente, per mano dell'uomo, per le perle naturali questo processo avviene casualmente, generalmente dovuto ad un granello di sabbia che entra accidentalmente all'interno dell'ostrica e da lì via alla perliferazione.

Cosa simboleggiano le perle?

In tutte le regioni del mondo in cui si sono conosciute le perle, sono nate leggende sulla loro origine e miti sui loro attributi. Sin dai tempi antichi, le diverse civiltà, hanno attribuito alla perla proprietà benefiche e curative e simbolismi spesso legati alla donna, alla sua purezza, alla bellezza, alla fertilità.

Come conservarle?

Per preservare la lucentezza delle perle è suggeribile non indossarle quando si applicano trattamenti cosmetici o fissanti per acconciature; pulirle con un panno di cotone umido e custodirle in un panno separatamente da altri oggetti.

How to distinguish real pearls from fake ones?

The easiest and most popular way to recognize fake pearls is the “tooth test”, which consists in taking a pearl and rub it along the biting edge of your tooth: a real pearl will feel gritty and rough, while a fake one will have a smooth and flowless surface.

Which is the difference between cultured and natural pearl?

The main real difference is in the way to insert the “nucleus” in the oyster: for the cultured pearls it is made artificially by human hands, while in the natural pearls this process happens naturally when an irritant, generally a grain of sand, accidentally enters inside the oyster.

What do pearls symbolize?

In all the regions of the world where pearls were known, legends were born about the origins of pearls and myths about their attributes. Since ancient times, the different civilizations have attributed to the pearl beneficial and curative properties and symbolisms often associated to women, to their purity, beauty and fertility.

How to preserve pearls?

In order to preserve the luster and the quality of pearls, we suggest not to wear them when using perfumes or cosmetics; clean them with a damp cotton cloth and store them in a cloth separately from other items.

HOW TO WEAR *Pearls*

IL COLLARE GIROCOLLO (circa 38 cm)

Solitamente composto da più fili di perle indossati stretti a mezza altezza sul collo, il girocollo segue l'elegante look Vittoriano, molto amato anche dalla principessa Diana.

CHOKER (circa 40 cm)

Si differenzia dal girocollo per essere meno teso; è infatti indossato più morbido, nella parte inferiore del collo. Si adatta sì ad un look informale da giorno che elegante da sera.

PRINCESS (circa 45 cm)

È la collana classica per eccellenza, adatta a qualsiasi contesto o tipo di abbigliamento.

MATINÉE (circa 55 cm)

Chiamato anche «Sautoir» è una collana di mezza lunghezza che dona elganza anche ad un semplice tailleur. È appropriato nelle occasioni formali.

OPERA (circa 65 cm)

Si compone di un unico filo molto lungo e segue le tendenze della moda attuale. Può essere indossato sia con abiti più casual che eleganti.

COLLANA LUNGA

Questo taglio ci riporta inevitabilmente allo stile degli Anni 30' e all'iconica Coco Chanel, che amava indossare questa tipologia di collana sia lunga che annodata. Oggi, come allora, la collana lunga di perle è assolutamente oggetto di tendenza, perché si adatta ai look più diversi.

COLLAR (about 38 cm)

Usually composed by multi pearl stands, tightly worn at the neck, follows the Victorian style, loved even by Princess Diana.

CHOKER (about 40 cm)

It differs from the collar to be less tight; it is indeed worn softer, at the bottom of the neck. It is suitable for an informal everyday look or for elegant evening wear.

PRINCESS (about 45 cm)

It is the classic necklace, everyone can wear for any occasion or look.

MATINÉE (about 55 cm)

Also called «Sautoir» is a half-length necklace that gives elegance even to a simple suit. It is appropriate for formal occasions.

OPERA (about 65 cm)

It consists of a single long necklace and follows the current fashion trends. It can be worn with both casual and elegant looks.

LONG NECKLACE

This style inevitably reminds the '30s look and the iconic Coco Chanel, who loved to wear this kind of necklace long or knotted at the neck. Today, as then, the long pearl necklace is absolutely trendy, because it is chic and elegant in every look.

Perle d'Acqua dolce di Alta qualità *High quality FRESH WATER pearls*

COLORE: Di colore bianco, rosa e arancio si trovano in tutte le sfumature sino ad arrivare al lilla, salmone e arancio intenso.

DIMENSIONI: dai 2 ai 12 mm di diametro

Coltivate in Cina, nei laghi, nei fiumi e canali delle province a ovest di Shanghai vengono prodotte da una specie di molluschi chiamati Hyriopsis Schlegeli Cumingii, comunemente noti come il "mollusco triangolare".

COLOUR: white, pinkish or peach-colored, they presents a wide range of shades, from lilac to salmon or orange tones

DIMENSION: from 2 to 12 mm in diameter

Fresh water pearls are mainly cultivated in China, in lakes, rivers and manmade ponds located in the West districts of Shanghai.

They originate from a mollusk species called Hyriopsis Schlegeli Cumingii, commonly known as the "triangle mussel".

C O S C I A

*PEARL JEWELLERY
/ 2025 COLLECTION*

TAHITIAN

Perle Nere o Tahitiane *TAHITIAN or Black Pearls*

COLORE: dal giallo pallido al nero con sfumature verdi
ad ala di mosca

DIMENSIONI: da 8 a 20 mm di diametro

Le perle nere nascono dalla Pinctada Margaritifera Cumingi,
una specie coltivata nei mari polinesiani di Tahiti.

COLOUR: from pale yellow to black with green shades,
like the green-winged fly.

SIZE: from 8 to 22 mm in diameter.

Black Pearls originate from the Pinctada Margaritifera
Cumingi, cultivated in the Polynesian seas of Tahiti.

C O S C I A

C O S C I A

*PEARL JEWELLERY
/ 2025 COLLECTION*

AUSTRALIAN

Perle Australiane o dei mari del Sud *Australian Pearls or South Sea Pearls*

COLORE: gradazioni dal bianco sfumato silver fino al giallo

DIMENSIONI: da 8 a 22 mm di diametro

Le perle dei mari del sud crescono lungo le coste nord occidentali dell'Australia e coltivate in conchiglie di grandi dimensioni (Pinctada Maxima).

South Sea Pearls

COLOUR: from white with silver shades to golden-yellow nuances.

SIZE: from 8 to 22 mm in diameter.

South sea pearls are cultivated along the north-western coasts of australia. They grow in large shells, called pinctada maxima.
